(Super Fund Site) – New England Transrail Transfer Site, Eames Street Wilmington, Ma

November 21, 2016

To Whom It May Concern,

As Trustees of a Commercial building located at 4 Jewel Drive that directly borders the Olin Property site, we collectively have many concerns about the selling of the Olin property (a Super Fund Site) to New England Transrail for a Transfer site.

Our building has 14 occupied units and we are very concerned that the reuse of the site could disrupt existing toxins that could contaminate our property thus endangering human life and decreasing our property values.

We would like to note the fact that the EPA has NOT completed their investigation of the property and has not issued any "land use controls" that set restrictions on how a site can be used or established long-term public health warnings.

We, the Trustees of 4 Jewel Drive Condominium Association would request the Town of Wilmington, Wilmington Health Department, Office of Environmental Analysis, and New England Transrail to consider these concerns and not move forward with this project.

Respectfully Yours,

Trustees
